Forecast for Wednesday 08 Jun 2022

Weather: Outbreaks of light and patchy rain during the early hours will fade away shortly after dawn. Cloud will lift and break to allow some bright or sunny spells, but the sunshine will trigger scattered heavy showers, these possibly thundery and mixed with hail. The risk of thunderstorms passes mid-afternoon onwards, with showers easing to leave a dry evening with clear spells.

Chance of cloud-free hill tops above 600m: 40% at first otherwise 90%.

Low cloud and visibility: Periods of cloud down to 400-500m in the early hours and at first Wednesday morning, particularly affecting western slopes. Otherwise cloud will be generally clear of the summits with only patches lowering to 750m in showers. Visibility generally good beneath cloud, but moderate in rain and lighter showers, and briefly poor in heavy showers or hail.

14:00 on Tue 07 Jun 2022	0.2mm	6.6mm	12.8mm

Forecast for Thursday 09 Jun 2022

Weather: Clear spells during the early hours and some early sunshine on Thursday morning before skies cloud over. Outbreaks of rain and drizzle will spread from the southwest during the morning, and will continue during the afternoon and evening.

Maximum wind: Southwest 25mph gust 35mph.

Chance of cloud-free hill tops above 600m: 90% deteriorating to 20% or less by midday.

Low cloud and visibility: Patchy cloud near 700m at first will thicken and lower as rain and drizzle arrive, bringing extensive cloud on slopes above 400-500m. Visibility beneath cloud initially good, but becoming moderate occasionally poor in outbreaks of rain and drizzle.

Temperature: **Valleys:** Plus 10 Celsius becoming plus 16 Celsius.
At 600m: Plus 9 Celsius.
Freezing level: Above the summits
